Claims 1-16 allowed.

The following is an examiner's statement of reasons for allowance:

YATES discloses an electromechanical switching device operative to electrically interconnect a positive terminal of a first power source to a selected one of a positive and negative terminal of a second power source and a negative terminal of said first power source to another one of the positive and negative terminals of said second power source thereby to define a selected coupled state for the first and second power sources.

KAZMIEROWICZ discloses an electromechanical switching device operative to electrically interconnect a positive terminal of a first power source to a selected one of a positive and negative terminal of a second power source and a negative terminal of said first power source to another one of the positive and negative terminals of said second power source thereby to define a selected coupled state for the first and second power sources.

The prior art does not teach or suggest to teach when taken in combination, an electromechanical switching device wherein the actuator interacts with a composite magnetic field to automatically move said switch into whichever one of said first and second states that interconnects said first and second power sources or wherein the

Art Unit: 2836

actuator is responsive to the interaction between said first magnetic field and second magnetic field to establish electrical interconnection between the desired terminals of said power sources.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
